

## **Subtitle For The First Video**

**Dewi :** “Hello everyone!!

So, in this video we want to talk about an application that we find it from playstore.

The app’s name is Even Hits. This app is used to seacrh many kinds of events, like bazaar, game competition, festival, workshop, and many more.

In this app we can also register and buy the ticket.

And because we’ve downloaded the application, so let’s just open it.

So, at the first time we open the app, we are asked to pick a city,

We can fill it or we can just skip it.

After that, the display that appears is that we are asked to fill out an email.

On this form, it says “sign up or log in”, but it only provides one line for an email.

But it will make a little confused, whether this email is used to create a new account or log into an existing account.

If I try to enter an email that has not been registered, it will lead to a sign up form.

But if I try to enter a registered email, it will lead to a log in form.

And I think it’s kind of wasting time.

It will be more better if from the beginning it was told that this is a form to create an account, or if you already have an account you can click log in button.

I think that’s all from me.”

**Savitri :** “oh, you said it will be like another app that if you want to log in just log in. or if you don’t have an account just create it first. Is that what you mean?”

**Dewi :** “yes, it is. And that’s all about the log in form. And then, what else?”

**Rahma :** “lets look at the search section.

There are 3 button that we can use to search an event.

But it will also make a little confused,

Because three of them have the same function.”

**Dewi** : “oh I see. At the top, there is a sort of search symbol and...”

**Rahma** : “ yes, and at the bottom and also at home page”

**Savitri** : “why should there be three kinds? Is one not enough?”

**Rahma** : “it will be easier to use if there was only one search button”

**Dewi** : “yes, it would be better if only one, but it include the filtration.”

**Rahma** : “yes, it is”

**Dewi** : “because at the first try, I felt confused too about the difference from the top one and the bottom one.”

**Rahma** : “yes, in the fact, it has the same function”

**Savitri** : “and then, if I clicked the search symbol at the top, it look less attractive.”

**Rahma** : “it will be all red”

**Savitri** : “yes, and it doesn’t look like a search place.”

**Dewi** : “it looks more like a place to write long sentences.”

**Savitri** : “yes. And that’s a little weird”

**Dewi** : “yes, I got it. So, is there anything else?”

**Savitri** : “I think at the events section. I’m confused.

Why in this section we have to pick a city too,

Though it would be the same as the search section?

Why this section doesn’t immediately display all events from all cities?

So it will not just Jakarta, or just Malang, but from all of the cities. Do you get it?”

**Dewi** : “ yes, I got it. Because if we enter a city in this section  
so what’s the difference between this section and the search section?”

**Savitri**: “ Yes. That’s it”

**Rahma** : “ to make it faster too,right?”

**Dewi** : “yes. So everything is displayed”

**Savitri** : “for example, when you’re scrolling the event section,

And you find an interesting event in your friend’s city,

But she doesn’t have this app yet.

Then, most likely you’ll tell her that there is an interesting event with her favorite guest star in her city.

And it will make your friend also interested and will soon download this app too.

It will also increase the number of users. So, yeah I think that’s all.”

**Dewi** : “yes. And we already have three corrections”

**Savitri** : “ is there anything else?”

**Dewi** : “I think, in another section is already nice”

**Savitri** : “let’s look in the likes section. I think it’s enough.

But then again, if we skipped log in at the first,

So in this section, we are asked to log in”

**Dewi** : “yes, it will be better if from the beginning we are asked to sign up or log in”

**Rahma** : “ yes, it is enough to do it once at the beginning”

**Dewi** : “so, maybe that’s all.”

**Savitri** : “anyone still want to add maybe?

From me, I think that’s enough. Or maybe later.”

**Dewi** : “so, that’s all from our team about the evaluation of Even Hits.

Or maybe later if necessary”

“so that’s all for this video. Bye!!”
